Plant Templin-Bradley Lawn Seed This Year

Fall Seeding Gives Good Results—No Hot Sun, Plenty of Fall Rains
Use Our Famous Blends—Known Everywhere

The reason many people like to sow their lawn seed in the fall is because there is greater assurance in that season that the days after the tender young shoots rear their heads above ground will be cool, permitting the plant to develop without being retarded by killing hot sun, as so often happens with late spring planting. The idea is sound and you reap the benefit next spring.

For Shady Places

Shady Nook Mixture. Containing varieties that naturally grow in shaded places. The shady lawn must have special care as well as right kind of seed. Lb., \$1.35; 3 lbs., \$4.00; 5 lbs., \$6.60; 10 lbs., \$13.10; 25 lbs., \$32.50.
